

Curriculum Review Subject French

Intent: what we want to achieve

We want pupils to be open minded, tolerant and respectful citizens who appreciate differences of other cultures. We want to develop pupils who gain a passion for learning different languages and who have the desire to continue this learning through their education.

Implementation: how we will achieve this

- We will use a progressive scheme of work, which is rooted in the National Curriculum. We will ensure this is regularly reviewed and developed and that it motivates pupils, builds on previous study and expands the pupil's knowledge and understanding of French.
- A range of teaching methods will be used to fulfil the lesson objectives and these will follow those outlined in the National Curriculum.
- We will develop high quality resources that are tactile, IT based, written and visual which allow children to fully engage with the language.
- We will provide multisensory activities, and a wide variety of learning experiences to motivate learning and curiosity in the language.
- We will provide opportunities for pupils to work independently, in pairs and in small groups.
- We will use precise tracking and assessment to move pupils' learning forward through the Key Stage.
- Pupils will develop their capacity to evaluate their own understanding of the language.
- We will promote excellent outcomes through positive values based growth mindset modelling and reinforcement.
- We will ensure that staff training is carried out through attending appropriate courses and encouraging teachers to reflect on their own practice and share with their colleagues.
- Lesson observations in classrooms will monitor continuity and progression throughout the school.
- Information Technology will be used throughout lessons to extend children's understanding of the written words. As well as to engage children in activities to extend and embed their learning.
- We will deliver lessons that allow children to become confident with speaking the language in front of their peers.

Impact: the intended outcomes of the French curriculum

- Pupils will develop a love of learning the language, will become curious and will want to complete extra work and personal investigation.
- Pupils will work hard, strive to meet challenges and will become resilient learners.
- Pupils will learn to work independently or will contribute effectively to partner or group work.
- Pupils will develop as considerate, tolerant and empathetic citizens.
- Pupils will develop as effective communicators in their spoken work.
